

The FUND

The Fund seeks to maximize real returns, consistent with prudent investment management. The Fund provides investors with comprehensive access to commodity assets like oil, gold, wheat and corn. The Fund invests in the equity securities of commodity-related companies and commodity futures-related investments, collateralized by U.S. Treasury Inflation Protected Securities, and may also invest in commodity futures contracts and physical commodity ETFs. The Fund is actively managed and uses quantitative models to help reduce "Contango," or costs associated with replacing expiring futures when new contracts are more expensive.

The BENEFITS

- » Commodities have historically provided investors with an effective hedge against inflation. Past performance is no guarantee of future results.
- » Adding commodities to a portfolio of stocks and bonds may enhance diversification, though diversification may not protect against loss.
- » Commodities can help capitalize on growth in emerging economies and rising demand for raw materials.

Fund FACTS

Symbols & CUSIPS

A Shares	JCRAX	317609675

¹ Fund performance for 2010 is from June 29, 2010, the inception date for the Fund, through December 31, 2010.

Performance data quoted represents past performance. Past performance is no guarantee of future results and investment returns and principal value of the Fund will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. The Fund imposes a 2.00% redemption fee on shares held for less than 30 days. Performance shown does not include the redemption fee, which if reflected would reduce the performance quoted. Current performance may be higher or lower than the performance quoted. Call 866.759.5679 for current month end performance. Maximum Offering Price (MOP) for Class A shares includes the Fund's maximum sales charge of 5.50%. CDSC performance for Class C shares includes a 1% contingent deferred sales charge (CDSC) on C shares redeemed within 12 months of purchase. Performance shown at NAV does not include these sales charges and would have been lower had it been taken into account.

Commodity Strategy Allocation Fund

An ALPS Advisors, Inc. Solution

Class A, C & I
FUND UPDATE | 12.31.11

A SOLUTION BASED Partnership

ALPS Advisors, Inc.

Risks & Others Disclosures

Investors should consider investment objectives, risks, charges and expenses carefully before investing, including "Additional Risks" as described in the prospectus. To obtain a prospectus, which contains this and other information, call 1.866.759.5679 or visit www.alpsfunds.com or www.jamfunds.com. Read the prospectus carefully before investing.

The Jefferies Asset Management Commodity Strategy Allocation Fund is distributed by ALPS Distributors, Inc., 1290 Broadway, Ste. 1100, Denver, CO 80203. ALPS Advisors, Inc. is the investment adviser to the Fund and Jefferies Asset Management, LLC is the investment sub-adviser. ALPS is not affiliated with Jefferies Asset Management. Jefferies Asset Management, LLC serves as investment adviser to the Fund's Cayman Islands subsidiary.

The Fund's investments may subject the Fund to significantly greater volatility than investments in traditional securities and involve substantial risks, including risk of a significant portion on their principal value.

The commodities markets and the prices of various commodities may fluctuate widely based on a variety of factors. Because the Fund's performance is linked to the performance of highly volatile commodities, investors should consider purchasing shares of the Fund only as part of an overall diversified portfolio and should be willing to assume the risks of potentially significant fluctuations in the value of the Fund. The Fund invests in commodity futures related investments, which are derivative instruments that allow access to a diversified portfolio of commodities without committing substantial amounts of capital. Additional risks of Commodity Futures Related Investments include liquidity risk and counterparty credit risk. Counterparty Risk is the risk that a party to a transaction will fail to fulfill its obligations. The term is often applied specifically to swap agreements in which no clearinghouse guarantees the performance of the contract. Liquidity Risk is the risk stemming from the lack of marketability of an investment that cannot be bought or sold quickly enough to prevent or minimize a loss.

Another principal risk of investing in the Fund is equity risk, which is the risk that the value of the securities held by the Fund will fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate or factors relating to specific companies in which the Fund invests. The Fund's investments in non-U.S. issuers may be even more volatile and may present more risks than investments in U.S. issuers. Equity investments in commodity-related companies may not move in the same direction and to the same extent as the underlying commodities.

Thomson Reuters / Jefferies CRB Index and the Dow Jones-UBS Commodity Index are unmanaged indexes used as a measurement of change in commodity market conditions based on the performance of a basket of different commodities. An investor cannot invest directly in an index.
